

Playbook. Live Stats. Scouting.

Draw your plays, call them from the sideline, track every snap, and scout next week's opponent, all in one app built around how football staffs actually work.

FLAG FOOTBALL

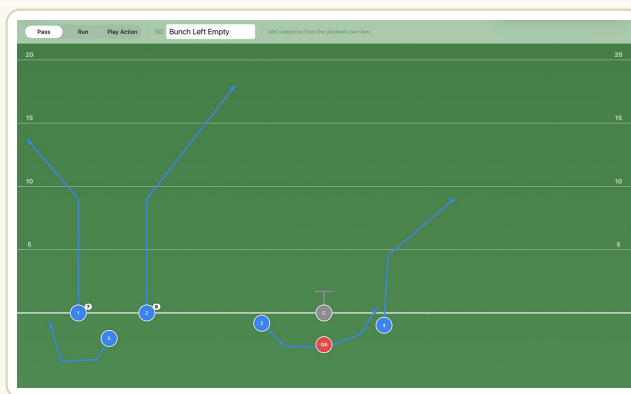

BUILT FOR iPad

01

PLAYBOOK MANAGEMENT

Draw it once. Use it all week, and on game day.

- ▶ **Chart your plays.** Draw offensive plays with routes and motion, and defensive calls with alignments and zone responsibilities. Formations, personnel groups, and special teams included.
- ▶ **Offense and defense, side by side.** Keep both sides of the ball in one team playbook, organized by categories you choose.
- ▶ **Build call sheets and wristbands.** Assemble game-day call sheets and wristband panels using your own play-calling terminology.
- ▶ **Print with play diagrams.** One-page call sheets, play sheets, and wristband cards sized to real wristband windows, with every play drawn.
- ▶ **Sideline whiteboard.** Start from any formation or play, sketch the adjustment in real time, and save it as a new play.

Play editor — "Coyote Echo" from Bunch Left Empty

02

RECORD STATS

Fast enough for the sideline. Deep enough for the film room.

- ▶ **Touch-first live input.** Tap players and spots on the field to log each snap in seconds. Score, clock, down, and distance keep themselves.
- ▶ **Your playbook drives the stats.** Tag the call on every snap and see play-call effectiveness in real time, broken down by call, situation, and drive.
- ▶ **Share live to other iPads.** Assistants follow score, situation, and every stat tab on a bench iPad as it happens, without touching the inputs.
- ▶ **Game reports.** HTML game reports and CSV exports, plus drive charts that draw every possession on a field.
- ▶ **Full-season totals.** Records, team totals, and player lines roll up automatically across the season.

Game report — score by period and team stats, shareable as HTML

TACKLE FOOTBALL

11-man formations with personnel groupings, offensive line, kickoff, punt, and return units.

FLAG FOOTBALL

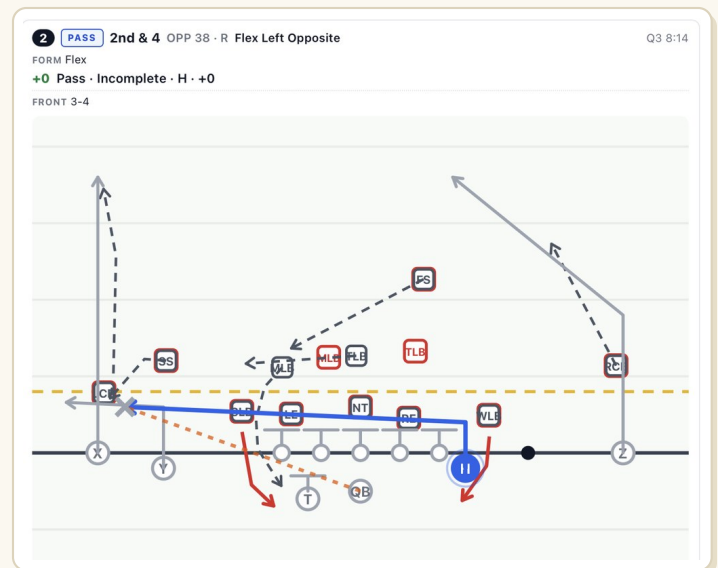

5v5 through 7v7, NFHS and NFL FLAG rules, including two-zone downs and shared defensive credit.

03

SCOUTING

Know what's coming before they line up.

- ▶ **Chart opponent film.** Log each snap's formation, play, defensive front, coverage, and result, linked to its spot in the film.
- ▶ **Find their tendencies.** Scouting reports break down what they do by down, distance, field zone, formation, and hash, ready to print and hand out.
- ▶ **Diagram their plays.** Draw the opponent's plays on the same canvas as your playbook so your scout team simulates them accurately.
- ▶ **Self-scout automatically.** Every game you track feeds the same tendency reports for your own team, so you can spot your own tendencies over the season before opponents do. No extra charting.
- ▶ **Prepare both sides.** Chart both teams in one game and scout their offense and defense from the same film.

Game report — every snap charted with its call, front, and result

Down & distance			
1st			
RUN		PASS	
Attempts	28	Attempts	7
Yards	302	Complete	3
Avg/att	10.8	Yards	22
1st downs	10	Avg/att	3.1
Explosive	9	1st downs	2
Stuffed	12	Explosive	0
		RUN 80% 35 plays	

Scouting report — run/pass split by down and distance, with efficiency behind it

YOUR GAME WEEK, IN ONE APP

1

SCOUT

Chart next opponent's film

2

PLAN

Read their tendencies

3

INSTALL

Draw and adjust your plays

4

PRINT

Call sheets and wristbands

5

GAME DAY

Track live, share to bench

6

REVIEW

Reports, season totals, self-scout

BUILT FOR THE SIDELINE

SHARE WITH YOUR STAFF

Send teams, playbooks, and games to another coach's iPad by AirDrop, Messages, or Mail.

YOUR TERMINOLOGY

Build calls from your own words for formation, motion, play, direction, and tag.

ROTATIONS AND DEPTH

Set up to three units per side, with rotation tables printed on the call sheet.

ROSTER FROM A SCREENSHOT

Import jersey numbers and names straight from a roster image, then review before saving.

CUSTOM ROUTE TREE

Redraw a route once and every play that runs it updates to match.

SITUATIONAL ANALYSIS

Run and pass splits by down and distance and field zone, for your team and your opponents.
